

All conveyors are shipped with a roller at each end. Depending on roller centers, one odd roller space may occur. All frames are punched for rollers .75" (19) from each end on 1.5" (38) centers

Specifications:

- Roller widths: 6" (152) to 24" (610)
- Conveyor lengths: 2' (610) to 12' (3,658)
- Load capacity up to 80 lbs/ ft. (119 kg/m)
- Roller centers 1.5" to 6" (38 - 152)
- Standard roller 1.25" (32) diameter anodized aluminum.
- 19" (30) diameter PVC rollers available for 6" and 12" (152 and 305) wide conveyors
- Metric fasteners

Features/Benefits:

- High strength anodized aluminum frame with a clear coat finish
- Low profile design for clean appearance and minimal protrusions
- T-slots for easy mounting of pre-engineered accessories
- Sections link together for additional length
- Easy machine and operator interface

Conveyor load capacity depends on conveyor size, incline, motor position, accumulated loads and other factors.
